INTERNATIONAL JOURNAL OF

Enterprise Information Systems

IGI PUBLISHING
Publisher of IT books, journals and cases since 1988
www.igi-global.com

Editor-in-Chief: Madjid Tavana (LaSalle University, USA)

Global markets and competition have forced companies to operate in a physically distributed environment to take the advantage of benefits of strategic alliances between partnering firms. Earlier, information systems such as Material Requirements Planning (MRP), Computer-Aided Design (CAD) and Computer-Aided Manufacturing (CAM) have widely been used for functional integration within an organization. With global operations are in place, there is a need for suitable Enterprise Information Systems (EIS) such as Enterprise Resource Planning (ERP) and E-Commerce (EC) for the integration of extended enterprises along the supply chain with the objective of achieving flexibility and responsiveness. Companies all over the world spend billions of dollars in the design and implementation of EIS in particular ERP systems such as Oracle, Peoplesoft, SAP, JD Edwards and BAAN with the objective of achieving an integrated global supply chain. Inter-organizational information systems play a major role in improving communication and integration between partnering firms to achieve an integrated global supply chain. There is a growing demand for research and applications that will provide insights into issues, challenges, and solutions related to the successful applications and management aspects of EIS.

COVERAGE

- Case tools for system development
- Design, development, and outsourcing of ERP projects
- E-Commerce (B2B and B2C) and ERP
- Enterprise resource planning
- Enterprise-wide client-server architecture
- E-Procurement, Web-based logistics, and supply chain management
- ERP implementation and organizational and systems issues
- ERP systems and virtual enterprises
- ERP, customer relationship management (CRM), and business process reengineering
- ERP, integration of functions, and extended enterprises
- Human-computer interaction on enterprise information systems
- Intranet and extranet business applications
- Knowledge-based systems engineering
- Modeling concepts and information integration tools
- Organizational issues on systems integration
- Strategic management information systems

SUBMISSION INFORMATION Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Madjid Tavana, tavana@lasalle.edu
