### TOPICS:

Business Information Systems (MIS); Technology/Innovation.

## MANUSCRIPT GUIDELINES/COMMENTS :

**Mission.** The primary objective of the *International Journal of Enterprise Information Systems* (IJEIS) is to provide comprehensive coverage and understanding of various enterprise information systems (EIS) such as enterprise resource planning (ERP) and electronic commerce (EC) and their implications on supply chain management and organizational competitiveness. Design, development, and implementation issues of EIS including ERP and EC will be discussed. These include organizational, people, and technological issues of EIS. The secondary objective of this journal is to expand the knowledge on ERP and EC and in turn help researchers and practitioners to develop suitable strategies, tactics, and operational policies for EIS and for improving communication in organizations. This journal publishes original contributions in the areas of design and implementation of EIS. *IJEIS* intends to be a forum for exchanging new ideas and developments in the field of EIS. This journal also acts as a medium of communication among EIS researchers and practitioners.

**Coverage.** The *International Journal of Enterprise Information Systems* (*IJEIS*) provides comprehensive coverage and understanding of the organizational, people, and technological issues of EIS. Design, development, justification, and implementation of EIS including ERP and EC will be discussed. Developing an integrated supply chain with ERP systems and business process reengineering using EDI, Internet, WWW, Intranet, and Extranet are encouraged. Performance measures and metrics in the design and implementation of EIS will be covered. Different models and experiences with EIS outsourcing will be discussed. Conceptual frameworks, case studies, empirical analysis, analytical, and simulation models on EIS are also encouraged.

The *International Journal of Enterprise Information Systems* covers the following topics (but not limited to):

- Case tools for system development
- Design, development, and outsourcing of ERP projects
- E-Commerce (B2B and B2C) and ERP
- Enterprise resource planning
- Enterprise-wide client-server architecture
- E-Procurement, Web-based logistics, and supply chain management
- ERP implementation and organizational and systems issues
- ERP systems and virtual enterprises
- ERP, customer relationship management (CRM), and business process reengineering
- ERP, integration of functions, and extended enterprises
- Human-computer interaction on enterprise information systems
- Intranet and extranet business applications
- Knowledge-based systems engineering
- Modeling concepts and information integration tools
- Organizational issues on systems integration
- Strategic management information systems

**All submissions and inquiries should be directed to the attention of:** Professor Madjid Tavana, Editor-In-Chief, *International Journal of Enterprise Information Systems*; La Salle University, Philadelphia, PA 19141; USA. Phone 215-951-1129; Fax 267-295-2854; <http://tavana.us>; Email: [Tavana@lasalle.edu](mailto:Tavana@lasalle.edu).
