

INTERNATIONAL JOURNAL OF

Strategic Decision Sciences

Editor-in-Chief: Madjid Tavana (La Salle University, USA)

The vast amount of information that must be considered to solve inherently ill-structured and complex strategic problems creates a need for tools and techniques to help decision makers recognize the complexity of this process and develop a rational model for strategy evaluation. IJSDS is a double-blind refereed journal whose focus is to promote the infusion of strategic decision-making with the analytical methods. IJSDS distinguishes itself as a business journal with an explicit focus on analytical strategic decision-making. The journal provides a publication vehicle for theoretical and empirical research as well as real-world applications and case studies. Papers published in IJSDS should not only meet high standards of research rigor and originality in decision sciences, but also embrace strategic decision-making.

ISSN: 1947-8569; EISSN: 1947-8577

Published: Quarterly; Est. 2010

Individual E-Journal: US \$135.00

Individual Print: US \$205.00

Individual Print and E-Journal: US \$265.00

Institution Print: US \$575.00

Institution Perpetual Access: US \$575.00

Institution Print and Online Perpetual Access: US \$835.00

Institution Online Perpetual Backfile: US \$405.00

Prices are subject to change without notification.

COVERAGE

- Applied probability
- Artificial intelligence
- Assignment
- Branch and bound
- Benchmarking
- Business process reengineering
- Combinatorial optimization
- Complexity theory
- Cost benefit analysis
- Data envelopment analysis
- Data mining
- Decision support systems
- Decision analysis
- Distributed decision making
- Dynamic programming
- Expert systems
- Facilities planning and design
- Flexible manufacturing systems
- Forecasting
- Fuzzy sets
- Game theory
- Genetic algorithms
- Geometric programming
- Global optimization
- Goal programming
- Graph theory
- Group decisions and negotiations
- Heuristics
- Integer programming
- Inventory management
- Investment management
- Knowledge-based systems
- Large scale optimization
- Linear programming
- Location planning
- Logistics management
- Manufacturing management
- Markov processes
- Multiple criteria analysis
- Multiple objective programming
- Multivariate statistics
- Network flows
- Neural networks
- Nonlinear programming
- Operations research applications
- Parametric programming
- Penalty methods
- Petri nets
- Production and operations management
- Productivity and competitiveness
- Project management
- Project scheduling
- Quadratic programming
- Quality control
- Quality management
- Queuing
- Regression
- Risk analysis
- Risk management
- Robustness and sensitivity analysis
- Routing
- Scheduling
- Simulation
- Stochastic programming
- Supply chain management
- Systems dynamics
- Tabu search
- Time series analysis
- Transportation management
- Travelling salesman
- Uncertainty modeling
- Utility theory

SUBMISSION INFORMATION Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:

Madjid Tavana, tavana@lasalle.edu
